

This Earth Day, come to Hallowell and find out everything you ever wanted to know about soil but were afraid to ask:

Soil Is Not Dirt

Thursday, April 22
4:30-7:30 pm

with David Rocque
Maine Dept. of Agriculture Certified Soil Scientist

4:30-5:15 Presentation at Hallowell City Hall, 1 Winthrop Street

5:30-7:30 Field session at Jamies Pond Wildlife Management Area
Take Outlet Road to Jamies Pond Road, Hallowell

What is the difference between a pile of dirt and a soil?
Why do some soils have rocks in them while other soils don't?
How do soil layers form? What is a hydric (wetland soil)?
How can you tell one from other soils?

This two-part program cosponsored by the Kennebec Land Trust and the Hallowell Conservation Commission is free and open to the public. Join us for either or both sessions. Bring a brown bag dinner if you wish!

For more information or directions
call the Kennebec Land Trust Office: 377-2848
or visit the trust's website: www.tkltr.org
